

Authorising Engineer (Lifts) HTM 08-02

Cundall's vertical transportation team are highly competent professional lift consultants with lengthy service to the lift and escalator industry. With Authorised Person accreditation, Chartered Engineers and extensive knowledge of lift industry standards and practices Cundall can provide Authorising Engineer (Lifts) services as per HTM 08-02.

Under Health Technical Memorandum 00 (HTM 00) the Designated Person (Lifts) has the duty to ensure the appointment of the Authorising Engineer (Lifts) and the Dutyholder.

Specific HTM defined services available from Cundall lift consultants:

Maintenance Audits

Lift installations in health care buildings should have yearly maintenance audits carried out by the Authorising Engineer or other third party. This includes an assessment of the maintenance provision, performance and general appearance of the lifts, and identification of health and safety needs.

Appointment of Authorised Person (Lifts)

Acting as Authorising Engineer, assess and make recommendations for the appointment of the Authorised Person (Lifts), ensuring that the AP has the required level of competency and understanding necessary to fulfil the role.

Planning, Design and Specification of Equipment

Our team can assist with the planning and design of vertical transportation in new developments to ensure a system suitable for application in a health care environment. A full scope of services can be provided from concept design thought to witness testing of the complete installations. For existing sites, we can also oversee design and specification of modernisation works to ensure lift performance and safety standards are maintained or enhanced.

Lift (Witness) Testing

Acting as Authorising Engineer, witness the commissioning process for completed new or modernised lifts to assess compliance with the employers requirements and HTM guidance, standard of workmanship and completeness of the technical file.

Other associated services of relevance:

- Safety Assessments
- Maintenance contractor monitoring and management
- BREEAM ENE06 assessments

HTM Lift Role Definitions

Designated Person (Lifts) – an individual appointed by a healthcare organisation (a board member or person with responsibilities to the board) who has overall authority and responsibility for lifts and their safe operation.

Authorising Engineer (Lifts) – an independent professional adviser to the healthcare organisation with appropriate experience

Dutyholder – an individual legally responsible for ensuring that the lift is safe to use and that it is thoroughly examined
